
SEO Elite

SEO companies and professionals are finding life increasingly difficult with the spiraling competition for keywords in the search engines. If you are a SEO firm trying to have an edge in your industry, or a website owner wanting to get a better handle on SEO strategies, then you owe it yourself to own cutting edge technology. One such technology is actually available right now in the form of a software: SEO ELITE, a state of the art program with a lot to offer. SO WHAT IS SEO ELITE?

SEO Elite was created and conceived for the purpose of link building, a process which is essential in any serious SEO campaign

- Find relevant link partners
- Exchange links with these partners
- Ensure that the links are still there

To undertake the above manually is practically impossible, particularly as the number of link partners increases. SEO Elite has features that automate these steps and make the management of a linking building campaign manageable. SEO ELITE FEATURES:

- Find out how the page rank of any site that is listed at the top of the search engines (Yahoo, Google, MSN, AltaVista and Alltheweb) .
- Locate hundreds of high page rank websites in your industry. This unique feature will allow you to analyze exactly why your competitors are doing better.
- If you have a product to sell, search for Super Affiliate willing to promote it. By discovering who's promoting who, you can find out the star-affiliates who promote your competitors products or services.
- Show instant reports of which partners are still linking back to you.
- Do a backlink search on all major search engines.
- Discover how many and which pages each major search engine has indexed
- Finds out how your website is ranked for any search word. Produces detailed reports about this daily, weekly or monthly.
- Enables further analyses for all SEO savvy professionals between specialized Google search commands such as "allinanchor, allintext and allintitle) and regular searches
- Locates the websites which your competitors use for their advertising
- Locates penalized websites you link to.

THE THINGS I LIKE MOST ABOUT SEO ELITE:

- Without a doubt the ability to know about those "bad neighborhoods" websites. Primarily because receiving a link from a banned website could be extremely detrimental to your own. You can have the best product and the best website. You can spent hundreds of hours working towards your website marketing in addition to the money you spend in doing so, and all this will be in vain if you link with a bad guy out there. Knowing who were the bad guys was a real pain, sometimes even an impossible task, given that a site reputation can change overnight. Come in SEO elite and this is now a thing of the past. In addition it enables me to see which page is "bringing" my page down.
- Keyword analysis. This enables me to check how my pages rank for a list of keywords I am targetting. This feature alone has made the purchase of this software worth every penny for me.

- Enables me to analyse my competition by showing me which of their pages rank the highest and find out why.
THE THING ABOUT THE LINKING PROCESS

It's a pain. There is no two ways about it. But a necessary pain IF done properly. In the old days, a couple of years ago, reciprocal linking strategies were the "in thing". (My site links to yours, and yours links back to mine). Google quickly got in on the concept and figured out that this strategy was in place for the purpose of artificially increasing a page relevance. This in turns is not something that Google wants and so reciprocal linking strategies became less effective.
